## Community Relations

### Student Blood Donations

The Governing Board recognizes that many necessary community services depend upon the support of its citizenry. Preparation of the district's students for taking active roles as citizens appropriately includes opportunities for contributing in other additional ways as well as fund raising. Where such donations do not conflict with the family's religious or moral beliefs, the schools are encouraged to cooperate with the Red Cross in its blood donation program.

The Superintendent shall establish guidelines for student blood donation drives including provision for parental approval in the case of minor students.
