Students

Health Care and Emergencies

The Governing Board recognizes the importance of taking appropriate action whenever an emergency threatens the safety, health or welfare of a student at school or during school-sponsored activities.

The Superintendent or designee shall develop procedures to provide first aid and/or medical attention when student accidents and injuries occur and that parents/guardians are notified of accidents as appropriate.

The Superintendent or designee shall ask parents/guardians to provide emergency contact information in order to facilitate communication in the event of an accident or illness.

District staff shall appropriately report and document student accidents.

The Superintendent or designee shall ensure that all parents/guardians are informed of this policy.

Automated External Defibrillators

The Board authorizes the placement of automated external defibrillators (AEDs) at designated school sites for use by designated personnel who have voluntarily received the training in the use of AEDs.

The Superintendent or designee shall develop guidelines for employees regarding the use of these devices and shall ensure that employees receive training on their proper use and handling.

The guidelines shall also specify the placement, security, and maintenance as well as recommended use of the AED.

The authorization of AEDs in district schools shall not be deemed to create a guarantee or obligation to use the AED in the case of an emergency nor any expectation that an AED or trained employee will be present and/or able to use an AED in an emergency or any expectation that the AED will operate properly.

Automated External Defibrillators (continued)
